

## COMPANY FACT SHEET

**Founded:** June 2010 in San Francisco, CA

Currently in **215+ cities worldwide**

**Revenue (2015):** \$663.2 million in the first half of fiscal year 2015

**Employees (2015):** 1,000-5,000

### Company Overview

Uber is a technology company with a smartphone app that connects riders with drivers. Uber does not own/operate cars nor does it employ drivers. The company's application enables users to arrange and schedule transportation and/or logistics services with third party providers.

### Products and Services

Uber connects riders with safe, reliable, convenient transportation providers at a variety of price-points in cities around the world.

### Uber's Mission to the World

#### *Stronger Economies*

Uber helps revitalize local economies. In London, nearly a third of driver-partners live in areas where unemployment rates are highest.

#### *Opportunity for all*

A city with Uber welcomes new, flexible earning opportunities for all its residents. More than half of drivers in the US choose to work 10 hours a week or fewer. So parents, students, retirees, or anyone looking for extra income can work whenever they like.

#### *Work where it's needed*

88% of drivers say they drive with Uber to have more flexibility in their schedule and balance work with their life and family\*

#### *Improved Access*

Transportation that covers every mile. Not everyone lives close to a bus or train stop. And there are some part of cities where taxis don't go. Uber provides safe, affordable rides around the clock – regardless of where you live, where you're going, or what you look like.

#### *Bringing transit to your door*

Uber complements existing transit systems.

### *Safer Roads*

Uber helps curb drunk driving. Their rush hour starts after last calls at bars. Since uberX arrived in California in July 2012, there has been an estimated 6.5% decrease in drunk-driving crashes per month. And DUI arrests have dropped 10% in Seattle. When you can get a ride at the tap of a button, it's easy to leave the keys at home and make the responsible decision at the end of the night.

### *uberPOOL – Sharing the way to sustainable cities*

By matching people headed in the same direction, uberPOOL turns what would normally be multiple rides into one. In Los Angeles and Chengdu, two of their busiest cities, more than a quarter of trips are uberPOOL trips.

### *Making a world of difference*

In just one month, uberPOOL riders in San Francisco saved 674,000 miles – or about 27 trips around the world. Fewer miles driven means less fuel consumption and carbon dioxide emissions.

## **Leadership**
